Perfect Admin Free License Key

Perfect Admin is a powerful and easy to use tool for system administrators, which allows you to fulfil remote monitoring and control of the work of users in a local area network. With its help, you will be able to automatically control launching of the applications by the users in your network, prevent launching of the prohibited applications under the title of the window, configure flexible options of organization of the list of the prohibited applications, automatically lock Active Directory account on behalf of which the prohibited application was launched, display the list of active users in the network and applications, which are launched by them, displaying of their desktops, sending of messages to users, detailed events logging. Overview Password Manager Its function is to store, select and reuse passwords and other data. In accordance with the configuration you can: - store your username and password; - store the URL of the website (for example, "amazon.com"); - automatically generate username and password; - remember characters, numbers, letters and words; - generate random passwords for different purposes; - generate random passwords; View Data There are two modes of operation: Read-only - allows you to view the data without altering it. Editor - allows you to modify the configuration. Full-featured web interface With "Web interface", you can perform most of the operations locally from the terminal.The most important functions include: - user accounts, which can be created and deleted; - account passwords; - Active Directory account locking; - users in the network and applications, which are launched by them; - display of desktops; - complete events logging Installation Installation of the program is very simple. After installation, a link for installation is created in the right-hand corner of the desktop. You can run the program using this link or by double-clicking the icon, which was created during installation. Online Help In case of any problems you can contact us via the form (the form is in the help section of the program). FAQ Q1. How does the program work? A1. When the user launches the program, it checks the owner of the desktop, which is connected to it. If this user is a member of the administrator group of the domain controller, then the desktop is considered as belonging to the domain administrator. If the

user is not a member of the administrator group, then the desktop is considered to belong to the user who launched the program. b7e8fdf5c8
